

SUBMERGED PUMPS

## SERIES ARTIKA

for INDUSTRIAL GASES

### Technical features

- ▶ Available in single or multistage (2, 3, 4 or 6) configurations
- ▶ Inducer to minimise NPSH required
- ▶ Suitable to work submerged in a sump or in a tank
- ▶ Integrated motor suitable for VFD
- ▶ Low maintenance
- ▶ Low noise (< 80 dB)
- ▶ Suitable for both continuous and discontinuous use

### Liquids transferred

- ▶ LIN, LAR
- ▶ Cannot be used with LOX

### Applications

- ▶ Liquid transfer from mobile tanks to fixed tanks / ISO-container
- ▶ Processes that require set conditions of prevalence and capacity

### Optional accessories

- ▶ Sump equipped with safety valves, manual valves for gas and liquid venting and pressure gauge
- ▶ Feed through electrical connector
- ▶ Filter
- ▶ Flexible hose for suction, return and discharge line
- ▶ Leakage detection on feed through
- ▶ Mounting bracket for in-tank installations
- ▶ Electrical control panel
- ▶ Integrated skid solutions available on request

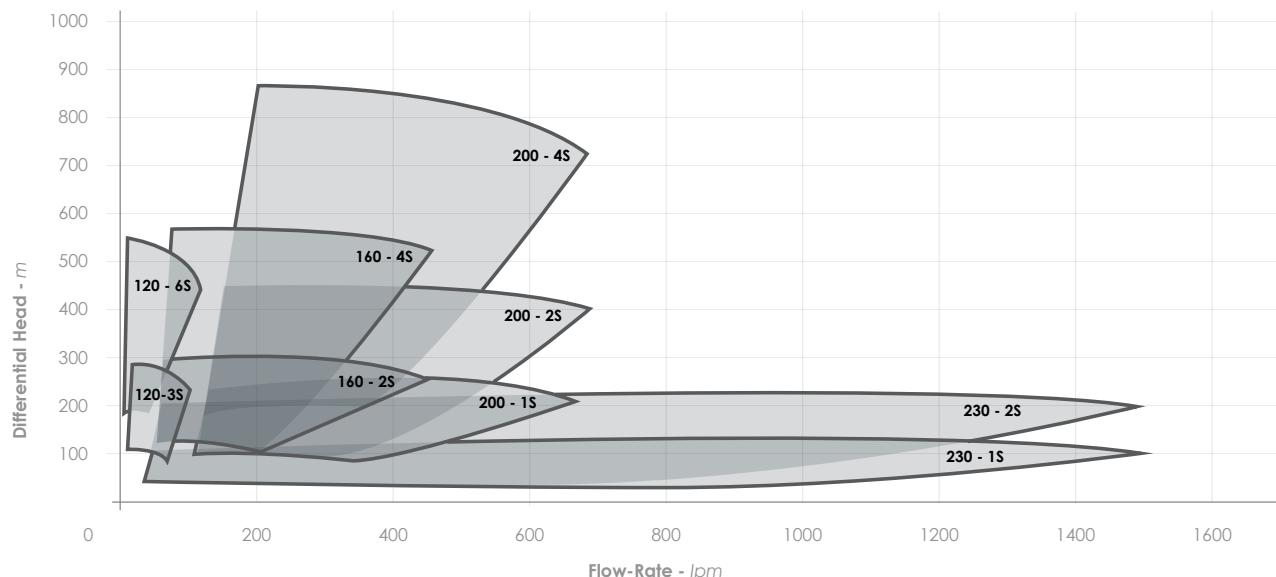

### Tests and controls

- ▶ Dimensional control of each mechanical component before assembly
- ▶ Running test of each pump with LIN before delivery

### Standards

- Project compliant with:
- ▶ European Machinery Directive 2006/42/EC
  - ▶ European PED 97/23/EC
  - ▶ EIGA/IGC/CGA Guidelines

MODELS AND PERFORMANCES
